

Manage all of your business' Push-to-talk communications in one place.

Push-to-talk Dispatch Console from Bell.

Whether your employees are on the road or on a job site, the Push-to-talk (PTT) Dispatch Console from Bell allows you to monitor and communicate instantly with your entire team from your computer. This Windows-based tool integrates seamlessly with PTT service from Bell, providing you with access to maps that show the location of PTT users<sup>2</sup>.

### What can you do with the PTT Dispatch Console?

- Make PTT calls to one contact, selected contacts or all contacts with the push of a button
- Send instant personal alerts to team members and receive updates back from the field
- Scan and monitor up to 16 PTT groups at one time and set listening priority for up to 3 of these groups with Talkgroup Scanning
- Record PTT calls and replay them for tracking and training purposes
- Map the location of mobile PTT users<sup>3</sup>
- Make a one-way broadcast call to up to 499 PTT users for high priority communications
- Takeover the call any time during an ongoing group call, even when someone else is speaking with Supervisory Override
- View the presence status for all contacts
- Log recent activity including alerts and PTT calls
- Move sections of the console for multi-screen viewing

### How can the PTT Dispatch Console benefit your business?

- Gain greater visibility and control of daily operations with powerful managerial tools like Talkgroup Scanning
- Enhance the efficiency of your PTT communication system with powerful administrator tools
- Reroute your fleet with real-time traffic status and ensure deliveries are completed on time
- Provide customers with more accurate arrival and departure times
- Connect with your team instantly when you need to respond quickly to emergencies or urgent customer requests

### Why choose PTT solutions from Bell?

#### Canada's largest LTE network.<sup>4</sup>

Connect instantly in more places from coast to coast, on Canada's largest LTE network that covers over 96% of the national population.

#### Canada's fastest ranked network\*

With the Bell network, you can upload and download with blazing fast speeds – helping your team keep pace with the speed of business. And we keep getting faster. We are rolling out the next generation of mobile technology, LTE Advanced, in communities across Canada. Visit [bell.ca/network](http://bell.ca/network) for details.

#### Canada's largest Wi-Fi network.

Your team can stay productive and conserve data while on the go. And you can make secure PTT calls over Wi-Fi.

#### Powerful PTT technology.

PTT from Bell uses the same onetouch technology used by some of the largest U.S. carriers<sup>5</sup> – the industry's clear choice in PTT technology. Plus Bell offers a wide range of PTT devices and accessories, including the largest selection of rugged devices.
