

Track, manage, and protect your vehicles, assets and drivers.

Fleet management solutions from Bell.

How do you manage your drivers when they are out on the road? Are your drivers complying with safety regulations? Bell offers a selection of GPS-based software platforms that can help your company efficiently manage vehicles and mobile assets. Optimize fuel costs and vehicle maintenance with real-time information on distance driven, engine idling, length of stops, routes taken and speed. Stay connected to your drivers, enhance the productivity of your fleet and reduce operating costs with our fleet management solutions.

Why should you track your fleet?

- Monitor and reduce fuel usage with accurate engine idling information
- Assign jobs to drivers closest to specific locations for quicker delivery
- Reroute vehicles away from toll roads to reduce expenses
- Guide team members when they are lost and need directions
- Ensure that your employees comply with Canadian Standards Association safety regulations
- Prevent excessive speeding
- Assess driver performance using comprehensive reports
- Manage maintenance schedules to prolong the lifespan of your vehicles
- Prevent theft and cargo spoilage

Key features of fleet management solutions from Bell.

- Full dispatch integration
- Electronic driver logs
- Speed, location, and travel direction
- Stop details and idle time
- Scheduled maintenance alerts
- Geofence violations – alerts when trucks drive outside of areas that you have specified
- Temperature monitoring
- 30+ reports that can be customized to your business

Choose Bell for world class Internet of Things (IoT) solutions.

Bell offers the best selection of global IoT platforms in Canada.

Only Bell offers access to M2M platforms powered by both Jasper and Ericsson, so wherever your business takes you, Bell has you covered better than anyone else.

Access to the largest LTE network across Canada.

The bigger the network, the more places you can benefit from the productivity benefits of M2M and IoT solutions. And Bell gives you access to Canada's largest LTE network, which covers more than 485,000 km² of the country.¹

Expert advice.

With the largest team of PhD's, SME's and professionals in the country, Bell will provide a team of certified IoT professionals and application solutions experts focused on the necessary device certifications and crafting of IoT solutions tailored to your business.
